

## DAMP PROOF MEMBRANE

Product Code	Pricing Unit	Colour	Type	Dimensions	Thickness (Gauge)	Pack Quantity	Pallet Quantity
PD1	Each	Blue	Multi-fold	4m x 25m	1000	10	40
PD1B	Each	Black	Multi-fold	4m x 25m	1000	5	40
PD1B2	Each	Black	Centre-fold	4m x 25m	1000	2	30
PX1	Each	Blue	Multi-fold	4m x 25m	1200	2	40

### Product Description:

Proguard Damp Proof Membrane complies with the relevant building regulations and is BBA approved. DPM (Damp proof membrane) is used as a moisture barrier to prevent moisture rising into a building. It can be used over concrete when flooring is to be laid above or between the hard core and the concrete floor.

Proguard 1000 gauge damp proof membrane is available in centre-fold and multi-fold. Centre-fold sheeting (product code PD1B2) is 2m wide on the roll and opens out to 4m which makes it easy to cover large areas quickly.

1000 gauge polythene sheeting has multiple applications in the building and construction industry. Apart from use as a damp proof membrane this product is widely used as a temporary roof covering, protection of newly-laid floors and other protection applications.

### Benefits:

- BBA Approved Damp Proof Membrane.
- Waterproof and rot proof.
- 100% recyclable and manufactured from recycled materials.
- Multi-fold and Centre-fold options.
- Easily cut with a knife.
- Extremely heavy duty – 1000 gauge (250 micron)

### Limitations:

- Product may become slippery when wet. Mop up any spills immediately or replace where necessary.
- This product is not available in clear. However for non-damp proofing requirements our *Proguard 1000g Clear Polythene Sheeting* can be used.

### Application:

Each roll is multi-folded with the exception of product code PD1B2 which is centre-folded. Simply unroll and unfold to use. Tape down any loose ends with *Proguard Low-tack PVC Tape* or *Proguard Ultra-Low Tack Tape* on sensitive surfaces.
