

### PROTECTALL WHITE SELF-ADHESIVE PROTECTION FLEECE

Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PFAW1	EACH	WHITE	1m x 50m	1.5mm	1	12

#### Product Description:

Proguard Protectall White Self-Adhesive Fleece is high-quality, high-performance protection for vertical surfaces. It provides abrasion and impact protection and is especially suited to glass areas such as windows, facades, balustrading, and doors. Protectall White is suitable for use both indoors and outdoors with a non-permeable self-adhesive backing which removes the need for time consuming taping. A high level of flexibility allows Protectall White to conform to curved surfaces and adhere to frames and profiles with ease.

#### Benefits:

- Effective protection for glass surfaces.
- Translucent, allowing light transmission through covered windows.
- 100% waterproof.
- Ideal for use on sensitive surfaces due to the soft material.
- Flexible material - ideal for wrapping around awkward objects such as balustrades.
- Self-adhesive.
- 100% residue-free on removal.
- Easy installation.
- Reusable.

#### Limitations:

- Although this product has high anti-slip resistance this product may become slippery when wet. Mop up any spills immediately or replace where necessary.
- Non-breathable. Use *Proguard Breathable Fleece* when this is required.

#### Application:

Ensure surfaces onto which Proguard Protectall White Fleece is to be applied are clean and dry. Lay the roll down at the bottom of the window. Pull the end of the roll upwards and press the top edge firmly into place. Smooth the film onto the surface, working from top to bottom. Carefully cut the attached section from the roll and smooth down the final section. Use a small overlap on each section to ensure the whole surface is protected.
