Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PESTC1	Each	Translucent	1200mm x 200mm	3.5mm	15	800

#### Product Description:

Proguard FR (Non-Cert) Correx Stair Tread Protectors can be installed quickly on any type of staircase providing effective temporary stair protection for vulnerable stair treads.

The Correx Stair Tread Protectors are manufactured from high density fluted polypropylene to provide impact resistant protection for the stair tread. This method of staircase protection is cost-effective and simple to apply.

Proguard heavy duty stair protectors are pre slit for folding to create a right angle and can easily be cut to size with a knife. Lightweight and hardwearing, Proguard stair tread protectors can prevent damage to staircases during building, construction, and refurbishment projects.

#### Benefits:

- Provides cost effective protection for stair treads, stair nosing and risers.
- Slip and water resistant.
- Can be cut to size with a knife.
- Lightweight and versatile.
- Reusable.
- Widely recycled.

#### Limitations:

- Must be fixed in place to avoid slippage.
- May become slippery when wet.

#### Application:

Place the stair tread protector on the stair tread. Trim to width if necessary. Fix using *Proguard Low Tack PVC Tape* or *Proguard Cloth Tape* depending on the sensitivity of the surface to which it is to be adhered to. They can also be fixed using TSD1 Duo Tape applied to the underside of the protector.
