

## HEAVY DUTY DIRT TRAP MATS

Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PSMH1	EACH	Buff	610mm X 910mm	36 Layers	1	40

### Product Description:

Proguard heavy duty trap mats are tacky plastic sheets that provide containment of dust and dirt during fit out and refurbishment work. The tacky mats will remove dirt and debris from foot and wheeled traffic.

Each tacky mat contains 36 peel-away layers coated with a pressure sensitive adhesive. The sheets help to protect from dirt and dust being transferred to non-working, clean areas, saving you clean-up time at the end of the project. Once the top layer becomes soiled this can be removed to leave a clean layer.

The sticky mat has a rubber surround to give the product weight to ensure it stays in place.

### Benefits:

- Heavy duty for industrial usage
- Prevent dirt and dust transfer into clean areas
- Anti-slip base with rubber surround – no fixing required

### Limitations:

- Each layer is not numbered

### Application:

Peel off the top layer which will leave a tacky surface which will remove dirt and debris from foot and wheeled traffic.
