HEAVY DUTY TARPAULIN

Product Code	Pricing Unit	Colour	Dimensions	Pack Quantity	Pallet Quantity
PSTP1	Each	Blue	3.5m X 5.4m	10	350
PSTP2	Each	Blue	5.4m X 7m	10	280

Proguard Heavy Duty Tarpaulins are manufactured from laminated polypropylene fabric to provide a tough, 100% waterproof barrier. They are perfect for protecting exposed areas of the building and covering building materials outside.

Placement of reinforced aluminium eyelets makes the tarpaulins easy to lash down securely. The heavy duty tarpaulin can be used as a ground sheet, for covering bricks, covering logs or vehicles such as cars, diggers, trailers. Proguard tarps are also popular for use on temporary roofing.

Benefits:

- Manufactured from tough, laminated fabric.
- 100% waterproof.
- Ideal for external use to protect building materials, vehicles from the elements.
- Regular placement of reinforced aluminium eyelets.

Limitations:

- Non-fire retardant.
- This product may present a trip hazard if it rucks. Ensure that the tarpaulin is pulled taught and it laid flat on the floor

Application:

Simply place the tarpaulin over the area to be protected and secure through the eyelets using rope, twine or bungee cords. If the tarpaulin sheet is being laid on the floor ensure that it is pulled taught to ensure a trip hazard is not created.
