

HESSIAN CLOTH

Product Code	Pricing Unit	Colour	Size	Pack Quantity	Pallet Quantity
PHC1	EACH	Brown	1.37m x 46m	1	30

Product Description:

Proguard Hessian Fabric Cloth is a multipurpose traditional temporary protection material made from Jute. Hessian cloth has a rough texture, is breathable and is naturally biodegradable.

Due to its excellent thermal properties, Proguard hessian cloth roll is often used in the construction industry to protect brickwork, mortar and concrete during the cold period. In summer hessian can be wetted, to stop concrete or cement from drying too quickly.

Hessian cloth is also known as jute and burlap.

Benefits:

- Perfect for protecting brickwork, mortar and concrete from frost.
- Breathable and biodegradable.
- 1.37m x 36m rolls.
- Can be cut with a knife.

Limitations:

- Non-flame retardant.
- Non waterproof – use polythene sheeting or a tarpaulin when this is required.

Application:

Each hessian roll is single wound. Simply unroll and cut to size with a knife or scissors. Cover the area to be protected and secure using cable ties or weights such as bricks.
