

BREATHABLE PROTECTION FLEECE

Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PFNBR1	EACH	Blue	1m x 50m	1.5mm	1	12

Product Description:

This highly breathable floor protection fleece is for newly laid floors, such as wooden floor, natural stone floors and resin bound floors. It consists of three layers. The anti-slip coated under layer prevents slipping, but also allows for shock absorbing. The middle layer is a unique vapour transmitting membrane. It allows moisture to escape from the curing floor, while preventing liquid coming through from the top. This allows the floor to cure, yet prevent contamination from above. The top layer is an extra strengthening layer and also helps absorb any spillage from above. This is the ultimate product for newly laid floors!

Benefits:

- 100% breathable
- Self-adhesive
- Non-slip surface
- Can be printed with company logo and details.
- Ideal for floors which need to cure
- Provides cushioned protection for sensitive surfaces such as marble

Limitations:

- We don't recommend this product to be used for heavily trafficked areas over long term projects. We recommend the Proguard Protectall Fleece for this application.
- Although this product has a high level of anti-slip resistance this product may become slippery when wet. Mop up any spills immediately or replace where necessary.
- Non – fire retardant.

Application:

Ensure surfaces onto which Proguard Breathable Fleece is to be laid are free from loose rubble. Beginning from the corner of the room roll the fleece back towards you using Proguard Cloth Tape on any joints if required. The soft fleece should be laid face up. Use Proguard Low Tack PVC tape when adhering to sensitive surfaces such as marble and glass. To ensure a completely residue-free removal we recommend using Proguard Ultra Low Tack tape.

Performance Data:

Breathability	2litre/sqm/24h
Thickness	1.5mm
