

ONE TONNE BULK BAG

Product Code	Pricing Unit	Colour	Size	Pack Quantity	Pallet Quantity
BT1	Each	White	90cm x 90cm x 90cm	25	250
BT2	Each	White	85cm x 85cm x 85cm	25	250

Product Description:

Proguard One Tonne Bulk Bags are made from heavy duty woven polypropylene. Also known as Bulk Bags, Big Bags, Tonne Bags, FIBC's and Jumbo bags – these big flexible containers are perfect for packing and transporting bulk loose granular or powdered products. They are also widely used in the construction industry for the removal of site waste.

Proguard builder's bulk bags are fully certified to a safe working load of 1000kgs (one tonne) with a safety factor of 5:1.

Benefits:

- Integral lifting loops (4 x 30cm) – no need to use pallets
- Compact to store when not in use.
- Carry up to 1000 times their own weight.
- Fully certificated Safe Working Load of 1000kgs with safety factor 5:1.
- Colour printing available.
- Recyclable.

Limitations:

- Single trip bags – not certified for multiple uses at full working load.

Application:

Builder's bulk bags are perfect for clearing site waste. Slip the four loops over the forks of a fork truck to create manoeuvrable site waste bin! Ensure that all four loops are in position before lifting.
